1. Forwarded herewith is the Far East Division Design and Construction Activities Report dated 1 December 1966 in the format suggested by Reference A and clarified by Reference B.

2. It should be noted that for an area as large as the FE Area timely and accurate reporting on all projects on a monthly basis is difficult to achieve. However, it is felt that reasonably good report data is obtained as an adjunct to fulfillment of the basic mission of the Regional Engineer Office when supplemented by feeder reports and special messages from other area units.

3. In the interest of updating and possible further simplification of subject report after nearly two years use, comments are requested concerning content, date of submission, scope, etc., particularly in view of possible changes in requirements at the Headquarters level. In this connection it is understood that the Station Engineer for the Vietnam Station has had some difficulty in submitting subject report and is in the process of recommending certain changes to meet local policies and conditions. Over the period of the last fourteen months, a similar type report was submitted directly to Headquarters with an information copy to the Regional Engineer Office at [REDACTED]
